**MOJO**  
SUSTAINABLE LIGHTING WITH A GOOD CAUSE

## *Buy light. give light!*

We are a structural donating partner of the WakaWaka Foundation since 2016. The mission of this foundation is to enable access to sustainable, solar energy for people in need of light and power.

The sun is the world's greatest natural energy resource. Solar energy is the solution for people who live off-grid (over 1 billion!) without access to electricity in low income countries. Access to light and power means access to education and communication, to income generating opportunities, to self-belief and a better future!

Read more about our good cause at: [www.waka-waka.com/en/foundation/](http://www.waka-waka.com/en/foundation/)

# HELLO!

Pleased to meet.

We, the Mojoz, want to do good by creating sustainable lighting and helping people at the same time.

With this new GOOD&MOJO collection, we have taken a step further towards plant-based lighting with an urban twist. The nature-meets-urban aesthetic is achieved by introducing sleek spot lights, stylish pendants and lamp bases in black and white. A good match with our contemporary shades. The collection features a wide range of smaller lights - perfect for tiny homes. Small in size, big in charm. The tiny home movement comes with a smaller environmental footprint and a simplified way of living. Our plant-based lighting contributes to that philosophy.

We hope that conscious buying and helping others will be the new standard. True to our motto - Buy light, Give light - we have donated over 8.250 WakaWaka solar lamps to families in need of light.

In 2019 we started supporting Eden Projects as well. For each lamp we sell, a tree is planted. Until now we have planted over 150.000 trees. We could have done this with your support only.

Thank you so much!

We hope you enjoy the new collection as much as we do.

XXX  
the Mojoz

# Sustainable Materials and...

**Old car tires** are no longer suitable for the use on vehicles. They are made of natural and synthetic rubber and not biodegradable. We have to be creative in ways to recycle and re-use these car tires, so we turned them into cool pendants!

**Jute** fibers are collected from the bast of the jute plant *Corchorus*. The plant is grown from seed and harvested within 4-6 months. The long fibers are spun into coarse, strong threads. Jute fibers are the most widely cultivated vegetable fibers after cotton.

**Rattan** is a climbing plant that is native to tropical regions in Australia, Africa and Asia. The plant absorbs carbon dioxide while growing. Annual growth is about 6m., it can grow up to 100m. in length. Rattan is strong, lightweight and flexible. When the woody stems are cut, the plant grows back from the roots. It is a natural material and biodegradable.

**Eco linen** is a textile made from the fibers of the flax plant and has been around for more than 2000 years. Linen is, compared to cotton 30%, stronger and less water/chemicals are needed for cultivation. A non-toxic dye is used to colour the linen. Our eco linen shades are available in six colours. They are handmade in the Netherlands.

**Seagrass** grows naturally in the coastal areas of Southeast Asia. For our products, we use cultivated seagrass. Seagrass beds are among the most productive ecosystems in the world. It grows well in salty soil and even helps to clean it. After harvesting, the plant is dried in the sun. The wear-resistant fibers are very suitable for weaving products.

**Cork** is a natural material. It is harvested from the trunk of the cork oak *Quercus Suber*. The harvesting process does not damage the tree. It is similar to shearing wool off a sheep. Cork oaks are productive for 150 years. Portugal produces 55% of the world production.

**Bamboo** is a very versatile, core material in our collection. It is a strong, flexible and fast-growing plant. The fastest growing type can reach one meter in a day! Bamboo can be harvested in 3-5 years. Once cut, new shoots grow back from the roots. The plant produces 35% more oxygen than a tree. The cultivation is without pesticides and chemical fertilizers. Bamboo is also used in construction, food, fuel and the clothing industry as well.

Sustainability is the ability to maintain the amount of natural resources without exhausting them or causing severe ecological changes. Biodegradability is the capacity of a material to decompose by micro organisms over time.

## ..Production

The vast majority of our lighting is handmade by crafts people in small, local communities in Vietnam. It takes about 3-6 hours to weave one lamp using old, traditional techniques. We have visited these villages and it is good to see that so many families earn their living this way. During their harvest season, production is low, so we have to take this into account with production schedules.

To give you an idea of how our lamps are made, we filmed on location while also enjoying delicious, local food!

To see our production movies: scan QR code and select Youtube.

The Zanzibar archipelago is known as the spice island of Africa.

The spices cloves, nutmeg, cinnamon and black pepper form the main industry.

**Lumen** = brightness.  
 Brightness is measured in lumen (lm). In the graphic above, you can compare lumen to wattage of a conventional light bulb. The higher the lumen = the brighter the light.

**Kelvin** = the light colour of a bulb.  
 A light's colour is measured in Kelvin (K). The higher the Kelvin = the colder the light.  
 Low Kelvin means warm light for a cosy atmosphere. Candle light is 1500K, a conventional light bulb is 2700K and office light is between 3300-5500K.

GOOD&  
MOJO  
SUSTAINABLE LIGHTING WITH A GOOD CAUSE

IT'S ABOUT RoMi®  
AMSTERDAM

**A TREE IS PLANTED FOR  
EACH LAMP WE SELL!**

Since 2019 we are partner of  
Eden Reforestation Projects.

Eden offers employment to people in  
impoverished communities in deforested areas  
around the world to plant, grow and protect trees.

Scan QR code to see a short movie  
about the good work of Eden.

**Eden Reforestation Projects**

BUY SUSTAINABLE LIGHTING  
AND DO SOMETHING GOOD FOR  
OTHER PEOPLE AT THE SAME TIME?

THIS IS POSSIBLE WITH US. WE ARE  
THE FIRST SUSTAINABLE LIGHTING  
BRAND WITH A GOOD CAUSE!

WE ARE SUPPORTING THE WAKAWAKA  
FOUNDATION AND A TREE IS PLANTED  
FOR EACH LAMP WE SELL.

BECAUSE WE, THE MOJOZ, BELIEVE  
IT'S NEVER TOO LATE TO MAKE  
A CHANGE & DO SOME GOOD.

JOIN US!
